Professional Summary

Motivated and detail-oriented **Computer Science B.Sc. candidate** (graduating 2026) with strong skills in **software engineering, object-oriented programming (OOP)**, and **AI driven application development**. Aimed at building **scalable, maintainable systems** using **Python, Java, C#, SQL, and JavaScript**, with additional experience in **data analysis** and **machine learning**. Adept at solving complex problems, working in **agile team environments**, and delivering robust solutions that combine solid backend logic with modern, responsive interfaces.

Core Competencies

Programming Languages:	Python, Java, C#, C, JavaScript, SQL, HTML, CSS
Frameworks & Tools:	React, Git, RESTful APIs Pandas, NumPy, PyTorch MySQL, MongoDB
Technical Expertise:	OOP, Machine Learning Fundamentals, Database Design, Data Structures & Algorithms
Soft Skills:	Analytical thinking, creative problem-solving, clear communication (Hebrew – Native, English – Fluent)

Education

B.Sc. in Computer Science – Sapir Academic College (2022 – Present)

Relevant Coursework: Data Structures & Algorithms, Database Systems, Software Engineering, Machine Learning, Web Development

Graduation Expected: 2026

Technical Projects

- **Data-Driven Video Analytics Platform** (naturanomaly) – Built a real-time analysis system combining structured data storage with natural language-to-SQL querying and advanced data visualization tools, via LLM chat UI.
- **Logic Truth Table Generator (Java)** – Developed a Java-based tool applying algorithmic design and data structures to dynamically generate truth tables for logical expressions.
- **Multi class SVM** – Developed a modular Multi Class SVM framework in PyTorch, (Linear, Gaussian, Polynomial). for stock-price movement prediction, implemented from scratch as part of a Machine Learning course.

Work Experience

• **Shift Manager – Nadav Kinuhim (2019 – 2021)**

Led and coordinated staff schedules, optimized workflows, and applied creative problem-solving to improve service quality in high-demand scenarios.

• **Military Service – Israeli Special Forces, Krav Maga Instructor (2014 – 2017)**

Designed and delivered training programs in Hebrew and English for elite units. Managed team schedules, developed structured course materials, and led hands-on instruction.

Key Strengths

- Strong foundation in OOP and modern software architecture.
- Practical experience with data analysis and basic machine learning workflows in Python.
- Ability to design and implement scalable, maintainable solutions with a focus on performance and usability.
